a) Definieren Sie f
 ür eine Funktion f : R^e → R^m die Aussa

b) Zeigen Sie direkt mit dieser Definition, dass die Punktion

differenzierbar ist, und bestimmen Sie die Ableitung P

 $dd_{x} = 2x_{1} \cdot dx_{1} + \left(x_{2}^{2} + x_{3}\right) dx_{2}$

q) If int diff. for in
